

FINAL ENGINEERING REPORT

FORT PECK ASSINIBOINE AND SIOUX WATER SUPPLY SYSTEM DRY PRAIRIE RURAL WATER SYSTEM

JANUARY 2002

VOLUME I

FINAL ENGINEERING REPORT

FORT PECK ASSINIBOINE AND SIOUX WATER SUPPLY SYSTEM

DRY PRAIRIE RURAL WATER SYSTEM

JANUARY 2002

Watson Engineering, Inc.
Helena, MT.

TABLE OF CONTENTS

EXECUTIVE SUMMARY

STATISTICAL SUMMARY

1. FORT PECK RESERVATION RURAL WATER SYSTEM ACT OF 2000, PL 106-382

EXHIBIT A - Fort Peck Reservation Rural Water System Act of 2000, PL 106-382

EXHIBIT B - Fort Peck Reservation Rural Water System Act of 2000,
House Report 106-382

2. INTRODUCTION

2.1	General Background	2-1
2.2	Guide to Remaining Chapters of Final Engineering Report	2-2
2.3	Brief Description of Project	2-4
2.3.1	River Intake	2-4
2.3.2	Water Treatment Plant	2-6
2.3.3	Pipelines	2-6
2.3.4	Pumping Stations	2-7
2.3.5	Reservoirs	2-8
2.4	Roles of the Sponsors and Agencies	2-9
2.4.1	Sponsors' Role	2-9
2.4.2	Federal Role	2-9
2.4.3	State Role: Dry Prairie	2-10

3. DEMOGRAPHICS

3.1	Population and Growth Rates of Project Area	3-1
3.2	Montana Indian Population and Growth Rates	3-1
3.3	Project Population Projection From 1990 Census	3-3
3.4	Distribution of 1990 Population Within Project Area	3-4
3.5	Comparison of Population Projections with 2000 Census	3-4
3.6	Housing and Source of Water	3-7

4. DESIGN CRITERIA

4.1	Summary of Sizing Criteria	4-1
4.2	Residential Water Use Criteria	4-1
4.2.1	Residential Water Needs	4-4
4.2.2	Household Water Needs	4-6
4.2.3	Gardening and Lawn Sprinkling	4-9
4.2.4	Total Residential Use	4-9

Table of Contents (cont)

4.3	Water Requirements for Non-Residential, Community Purposes	4-10
4.3.1	Schools	4-11
4.3.2	General Labor Force Requirements	4-13
4.3.3	Beauty Shops	4-13
4.3.4	Dentist Offices	4-14
4.3.5	Hospitals	7-14
4.3.6	Laundro-Mats	4-14
4.3.7	Motels and Restaurants	4-14
4.3.8	Service Stations	4-14
4.3.9	Total of Commercial Demands: Remaining Demand Available for Parks, Golf Courses and Other	4-15
4.4	Total Community Demand	4-15
4.5	Livestock Demands	4-17
4.6	Design Criteria and Cost Analysis	4-17
4.6.1	Sizing Criteria	4-17
4.6.2	Maximum Day Sizing Criteria	4-18
4.6.3	Peak Use Rates	4-20
4.7	Pipeline and Pump Station Sizing Method	4-20
4.7.1	Trial Pipeline Diameter	4-21
4.7.2	Final Trial Pipeline Diameter	4-21
4.7.3	Hydraulic Gradeline	4-21
4.7.4	Pipeline Pressure	4-21
4.7.5	Pump Station Criteria	4-23
4.7.6	Method of Applying Criteria	4-23
5.	EXISTING PUBLIC WATER SYSTEMS	
5.1	Public Water System Housing and Service Connections	5-1
5.2	Existing Public Water System Facilities	5-4
6.	WATER TREATMENT	
6.1	Water Quality Considerations	6-1
6.2	Secondary Contaminants	6-4
6.2.1	Hardness	6-4
6.2.2	Total Dissolved Solids	6-4
6.2.3	Iron	6-5
6.2.4	Manganese	6-6
6.3	Primary Inorganic Contaminants	6-7
6.3.1	Arsenic	6-7
6.3.3	Radionuclides	6-10
6.3.4	Sulfates	6-10
6.4.5	Fluoride	6-11

6.4	Microbiology and Turbidity	6-13
6.4.1	Filtration	6-13
6.4.2	Chlorination	6-14
6.4.3	Disinfection Byproducts	6-15
6.4.4	Groundwater Rule	6-16
6.5	Water Treatment Processes	
6.5.1	Raw Water Characteristics	6-16
6.5.2	Processes	6-19
6.5.3	Disinfectants and Disinfectant Byproducts	6-23

EXHIBIT A - NATIONAL DRINKING WATER STANDARDS

7.	PROJECT COSTS	
7.1	Project Cost Summary	7-1
7.2	River Intake	7-3
7.3	Water Treatment Plant	7-6
7.4	Unit Pipe Prices	7-9
	7.4.1 Introduction and Summary	7-9
	7.4.2 Easements Costs	7-12
7.5	Pumping Stations, Reservoirs, SCADA and Electrical Distribution	7-14
	7.5.1 Pumping Stations	7-14
	7.5.2 Storage Tanks	7-17
	7.5.3 Supervisory Control and Data Acquisition (SCADA) Instrumentation	7-21
	7.5.4 Electrical Distribution	7-22
7.6	Minor Construction Items and Contingencies	7-23
	7.6.1 Mobilization, Taxes, Bonds, Insurance and General Overhead	7-23
	7.6.2 Values and Other Appurtenance Costs	7-24
	7.6.3 Meter Pits	7-26
	7.6.4 Highway, Railroad and Stream Crossings	7-26
	7.6.5 Operation and Maintenance Buildings	7-26
	7.6.6 Contingencies	7-26
7.7	Non-Contract Costs	7-27
	7.7.1 Environmental Mitigation	7-27
	7.7.2 Federal Oversight	7-28
	7.7.3 Sponsor Administration	7-28
	7.7.4 Investigations	7-30
	7.7.5 Design Surveys and Geotechnical	7-31
	7.7.6 Design	7-31
	7.7.7 Construction Inspection	7-31

7.8	Value Engineering	7-31
8.	CONSTRUCTION SCHEDULE	
8.1	Construction by Project Segment	8-1
8.2	Scheduling of OMR Costs	8-3
8.3	Activities in Advance of Each Year's Construction	8-4
8.3.1	Preliminary Route	8-4
8.3.2	Permission to Survey and Easement Aquisition: Fort Peck Indian Reservation	8-6
8.3.3	Permission to Survey and Easement Aquisition: Dry Prairie	8-8
8.3.4	Surveys and Investigations for Engineering, Cultural Resources and Hazardous Waste Purposes	8-9
8.3.5	Permitting	8-9
8.3.6	Design, Design Review and Plan Amendment	8-9
8.3.7	Period of Advertisement, Bid Opening, Notice of Award And Notice to Proceed	8-9
9.	OPERATION, MAINTENANCE, AND REPLACEMENT COSTS AND RATE STRUCTURE	
9.1	Summary	9-1
9.2	Assiniboine and Sioux Rural Water System	9-1
9.2.1	Facility Replacements, Electrical and Related	9-2
9.2.2	Staffing Costs	9-7
9.3	Dry Prairie Rural Water System	9-8
9.4	Dry Prairie Monthly Cost and Billing Basis	9-11
9.5	Existing Water Costs, Sewer Costs and Water System Debt	9-14
10.	ABILITY TO PAY	
10.1	General	10-1
10.2	American Housing Survey	10-2
10.3	Regional Household Income	10-4
10.4	Regional Electrical Costs	10-4
10.5	Regional Housing Costs	10-7
10.6	Regional Residual Income	10-8
10.7	Regional Ability to Pay for Water	10-8
10.8	Montana Target Rate	10-11
11.	ECONOMIC IMPACT	
11.1	Summary	11-1
11.2	Project Costs	11-2
11.3	Employment and Earnings	11-2

Table of Contents (cont)

11.4	Livestock	11-3
11.5	Avoided Costs	11-3
	11.5.1 PWS Treatment	11-3
	11.5.2 Community and Rural Water Sources	11-5
	11.5.3 Excess Water Softening Costs	11-7
	11.5.4 Excess Costs of Water Heater Replacement	11-8
	11.5.5 Excess Costs of Bottled Water	11-10
	11.5.6 Federal Water Quality Compliance	11-11
	11.5.7 Brine Contamination	11-13
11.6	Indian Health Costs	11-14
11.7	Value of Improved Water Quality	11-16
